List of Contents

NUMBER 1

Y. H. Jung, K. R. Narendrnath, P. S. Godavarti and K. L. Murty	1	A personal computer based system to evaluate J-integral by a single specimen unloading compliance method—I. Methodology
R. Arone	19	Conservative estimation of crack growth under random overloads
G. M. Newaz	31	On the validity of orthotropic fracture model for advanced thermoplastic composites
S. A. Zhou and R. K. T. Hsieh	41	A thickness criterion for fracture toughness testing based on a plane stress compatible solution
D. Fanella and D. Krajcinovic	49	A micromechanical model for concrete in compression
P. R. Arora, M. R. Raghavan and Y. V. R. K. Prasad	67	Effect of prestrain on fatigue crack propagation in mild steel containing non-metallic inclusions
G. P. Nikishkov and S. N. Atluri	81	Three-dimensional elastic–plastic J-integral calculations for semielliptical surface cracks in a tensile plate
K. R. Abbott, P. Doig and R. F. Smith	89	A development of the single specimen fracture toughness test using the elastic compliance measurement of crack length
Luo Gangming and Zhang Yongyuan	97	Application of boundary element method with singular and isoparametric elements in three dimensional crack problems
Guo Quanxin and Li Kerong	107	The dimension of plastic zone ahead of a mode II plane stress crack
B. M. Singh, A. Cardou and M. C. Au	113	An analytical solution for stress intensity factors of external Griffith cracks in loaded two-dimensional projections
		Announcement
	125	International Conference on Fracture and Damage of Concrete and Rock, Vienna, Austria, 4–6 July 1988
	I	Software Survey Section

NUMBER 2

Amar C. Garg	127	Effect of moisture and temperature on fracture behavior of graphite–epoxy laminates

Wei Feng and **Yong-Yuan Zhang**	151	A boundary element procedure for estimating the residual fatigue life of three dimensional crack problem under cyclic loadings with varying amplitudes
Yasuo Ochi and **A. J. McEvily**	159	An evaluation of the fatigue crack growth and fracture toughness characteristics of rail steels
O. Kolednik	173	On the calculation of COD from the clip-gauge displacement in CT and bend specimens
M. Yoda	189	Subcritical crack growth and crack coalescence in glass
George T. Sha, J. K. Chen and **Chien-Tung Yang**	197	Energy perturbation finite element technique for damage tolerant design applications
X. S. Zhang	219	General solutions of an infinite sheet with doubly periodic cracks moving at constant velocity
C. W. Woo, Y. K. Cheung, Y. Z. Chen and **Y. H. Wang**	227	A simple model for the contact problem of a finite cracked plate in bending
Xu Li	233	Dual conservation laws in elastostatics
Y. M. Tsai	243	Interaction of a pair of coplanar central cracks in an orthotropic strip of finite width
	I	Software Survey Section

NUMBER 3

M. B. Ouezdou and **A. Chudnovsky**	253	Stress and energy analysis of toughness measurement for adhesive bonds
C. Levy and **M. Perl**	263	Controlled fracture in a finite geometry body as a stone shaping tool
R. H. Dodds, Jr, W. C. Carpenter and **W. A. Sorem**	275	Numerical evaluation of a 3-D J-integral and comparison with experimental results for a 3-point bend specimen
T. Hoshide and **D. F. Socie**	287	Crack nucleation and growth modeling in biaxial fatigue
C. S. Shin and **R. A. Smith**	301	Fatigue crack growth at stress concentrations—the role of notch plasticity and crack closure
K. Ortiz and **A. S. Kiremidjian**	317	Stochastic modeling of fatigue crack growth
J. Y. Huang and **H. So**	335	Diffraction of P waves by two cracks at arbitrary position in an elastic medium
C. R. Chiang	349	The dislocation field around a mode-II crack tip

G. A. Papadopoulos, H. G. Georgiadis and P. I. Poniridis 355 Finite length crack in a viscoelastic strip under impact—II. Numerical results

D. A. Mendelsohn and K. H. Whang 365 Localized asymmetric crack closure with stick–slip in the contact

Book Review

G. P. Cherepanov 385 *Mechanics of brittle fracture of materials with initial stresses* by A. N. Guz

I Software Survey Section

NUMBER 4

K. Rajanna, S. K. Bhambri and D. R. G. Achar 387 An assessment of a CrMoV cast steel weld joint for dynamic fracture behaviour

J. Zuidema and H. S. Blaauw 401 Slant fatigue crack growth in Al 2024 sheet material

D. Z. Zhang and X. D. Huang 415 The crack initiation and plastic work

L. A. James and W. J. Mills 423 Fatigue-crack propagation and fracture toughness behavior of cast stainless steels

M. V. V. Murthy, S.Viswanath, A.V.K.Murty and K. P. Rao 435 A two-dimensional model for crack closure effect in plates under bending

X. S. Zhang 453 A mode III central crack at the interface between two different media in a finite disc

Kang Yong Lee and Hyung Jip Choi 461 Boundary element analysis of stress intensity factors for bimaterial interface cracks

W. Lin and L. M. Keer 473 Growth of a hydraulically pressurized fracture

G. M. Newaz and J.-Y. Yung 483 Modeling split crack growth behavior in a unidirectional composite under fatigue loading

Per G. Clarin 497 On the sensitivity of the damage zone model for linearly softening materials

B. M. Singh, A. Cardou and M. C. Au 503 Plastic zone correction in a stretched thick-walled cylinder with an internal circumferential crack

513 Corrigendum

Announcements
